Heart Attack and Stroke Data Collection Initiative

What You Need to Know About the Project and How It Benefits Your Organization

Monday, September 15, 2014

Agenda

- Introductions
 - DSHS Health Promotion and Chronic Disease Prevention Section Staff

2

- Burden of CVD in Texas & Rider 97 Project Overview
 - Karla Granado, DSHS Program Specialist

3

- Data Governance
 - Kiran Bhurtyal, DSHS Program Specialist

4

- Review of FAQs
 - Karla Granado, DSHS Program Specialist

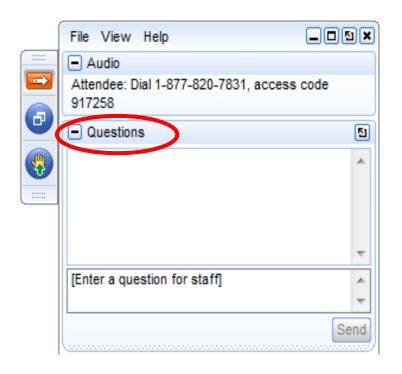

Š

- Live Q&A Session & Closing Remarks
 - Katie Wiechnicki, DSHS Chronic Disease Branch Manager

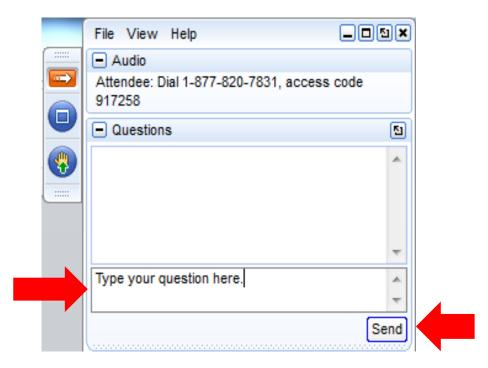

Submitting Questions

Locate the Questions panel on the right side of your screen.

Type in your question and click send.

Cardiovascular Disease & Stroke Program Overview

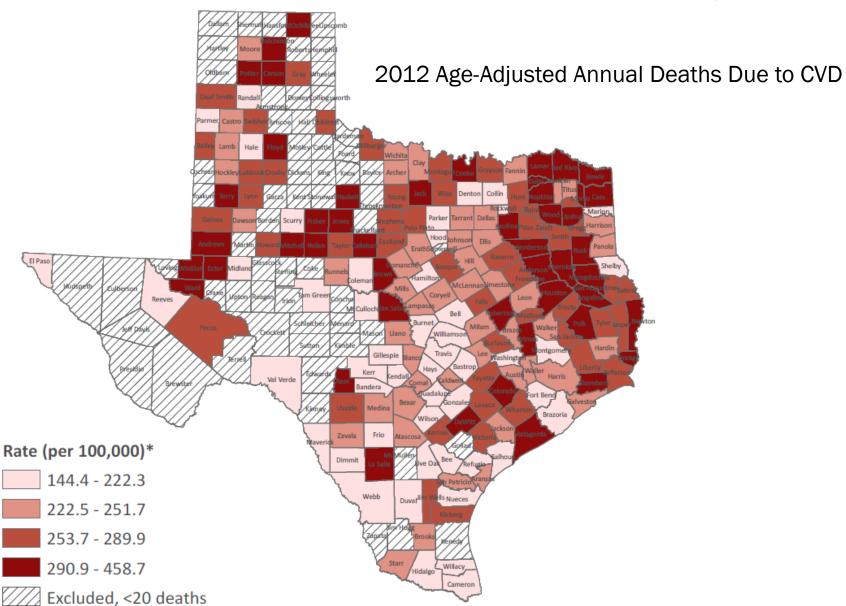

The Cardiovascular Disease (CVD) and Stroke Program works through multiple sectors to implement strategies that support and reinforce:

- healthy behavior
- community-clinical linkages
- health systems interventions
- surveillance and epidemiology

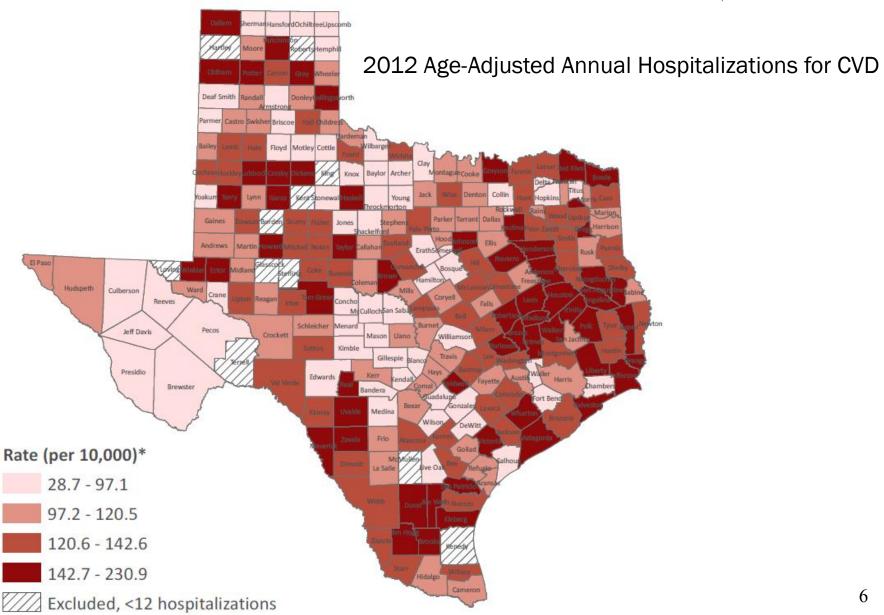

Burden of Cardiovascular Disease in Texas

Burden of Cardiovascular Disease in Texas

Project Staff

Health Promotion and Chronic Disease Prevention Section

- Section Director: Patty Moore, PhD
- Medical Officer: Roberto Rodriguez, MD, MPH
- Chronic Disease Branch Manager: Katie Wiechnicki, RN, MPH
- Cardiovascular Disease and Stroke Program Coordinator: Carleigh Wilson Baudoin, MPH
- Rider 97 Program Specialist: Karla Granado, MPH
- Office of Surveillance, Evaluation, and Research Manager: Nimisha Bhakta, MPH
- Office of Surveillance, Evaluation, and Research Program Specialist: Kiran Bhurtyal, MPH

Texas Council on Cardiovascular Disease and Stroke

- Texas Council on Cardiovascular Disease and Stroke provides guidance throughout the development and implementation of Rider 97
 - Consultants to the Chair

Rider 97 Overview

Background

- 83rd Legislature –\$5 million appropriated through general revenue funds to DSHS for stroke system of care coordination and stroke and ST-elevated myocardial infarction (STEMI) data collection
 - \$4.5 million over 2 years to the University of Texas (Lone Star Stroke) for research
 - \$.5 million for stroke/STEMI data collection

Goal

 Collect and analyze data that will inform a statewide gap analysis and identify areas of improvement in care for heart attack and stroke patients.

Heart Attack and Stroke Data Collection Project Overview

Project Components

- Hospital heart attack and stroke data collection
- Regional Advisory Council (RAC) data collection

Hospital Heart Attack and Stroke Data Collection

Contracts for hospital stroke and heart attack data:

- American College of Cardiology (ACC)
 - NCDR ACTION Registry-Get with the Guidelines (GWTG) heart attack data
- Duke Clinical Research Institute (DCRI)
 - American Heart Association Mission: Lifeline Texas report-STEMI data
- Quintiles/Outcome Sciences
 - GWTG Stroke data

Regional Advisory Council (RAC) Data Collection

- Contracts with RACs for aggregate heart attack and stroke data
 - Pre-hospital STEMI and stroke data elements
 - Stroke designated and stroke non-designated hospital data
 - STEMI and stroke system of care survey
 - Stroke transport plans
 - Heart attack and stroke education programming

How It Can Benefit RACs

- Receive a copy of DSHS aggregate reports.
- Each region would be able to compare their performance to other regions in the state, specifically useful to prioritize and enhance the work of the Regional Advisory Councils.
- Identify areas of improvement for systems of care in your region, e.g. gaps in pre-hospital care, transport, etc.
- Offers an opportunity to strengthen relationships with EMS agencies and hospitals through collaboration.

How It Can Benefit Hospitals

- Assist in the improvement of care for these patients across the state.
- Identify areas of improvement within your hospital for stroke and heart attack care.
- Receive a copy of DSHS aggregate reports.
- Receive a copy of the Mission: Lifeline Statewide Report, allowing individual hospitals to compare their STEMI care to the rest of the participants in the state, utilizing a unique identifier.
- For hospitals who are not enrolled in a Mission: Lifeline System/Regional Report, this would offer an opportunity to become a part of a regional report.

Where Are We Now?

- Heart attack packets were emailed July 23rd
 - 49 hospitals have submitted forms for participation
 - 6 hospitals will be enrolling in NCDR ACTION Registry-GWTG to participate in the initiative
- Stroke packets were emailed August 22nd
 - 25 hospitals have submitted forms for participation
 - 10 hospitals will be enrolling in GWTG-Stroke to participate in the initiative

What We Are Asking of Hospitals

Support for this initiative by participating in hospital data collection

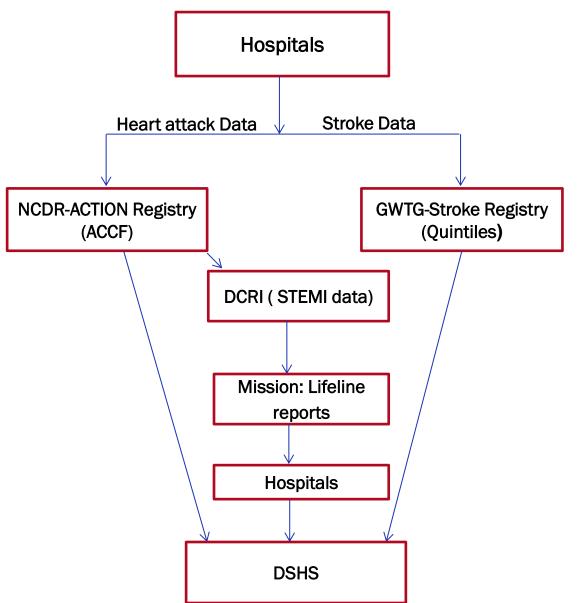

How to participate:

- Review participation forms that were sent to your hospital
- 2. Request for your leadership and legal departments to review the forms
- 3. Submit signed forms to cardio@dshs.state.tx.us

If you are not enrolled in the databases and are interested in enrolling, please contact Karla Granado at Karla.Granado@dshs.state.tx.us.

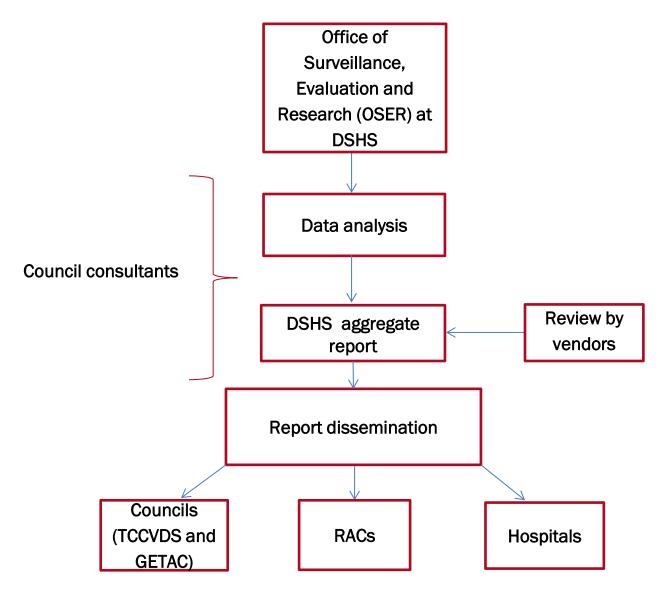

Data Management

Data Management

Data Harvest and DSHS Report

Data harvest

STEMI data: quarterly

Stroke data: quarterly

- Mission: Lifeline report: annually

Contents of DSHS aggregate report

- State-wide aggregate indicators of heart attack and stroke care
- To be finalized upon advisement from Texas Council on Cardiovascular Disease and Stroke and its consultants

Reporting frequency

- Quarterly (to coincide with the Texas Council on Cardiovascular Disease and Stroke / Governor's EMS and Trauma Advisory Council meetings)
- To be finalized upon advisement from Texas Council on Cardiovascular Disease and Stroke and its consultants

Data Security and Governance

Data use agreements

- Vendors
- Hospitals

Data components

- Heart attack data:
 - "Limited" ACTION Registry® GWTG™ v2 dataset with both patient and physician identifiers removed
 - Each export is cumulative and is received through Secure File Transfer Protocol (SFTP)
- Stroke data:
 - Limited Dataset Data received via a secure on-line System Reporter and System Report/Downloader

Data storage/access

- DSHS secure network drive
- password protected, non-portable computers
- Access to 2 DSHS data analysts

Data governance

- DSHS has a data governance plan in place
- Data storage, access, and use are guided by the governance plan, DSHS IT Operations department, IT Security Analysts, and IT Security Officer

Frequently Asked Questions

- How will you use the data that is collected?
- Who owns the data that is collected?
- Do hospitals have to submit any data to Texas Department of State Health Services?
- What level of data will DSHS get?
- How will the data be protected and secured? Who will have access to the data?
- How long are the agreements valid?

Frequently Asked Questions

- Do you have a data governance plan in place?
- Why are you using these specific databases?
- What reports will I receive? How often would I receive them? How will I receive them?
- What level of data will be shared in the reports that are distributed?
- Will others be able to identify my hospital in any reports that result from this initiative?
- Will hospitals be involved in the report review process?

Questions

• The line is now open for questions.

Thank You!
